ABOUT ME

I am fascinated with information technology, which drives me to pursue a degree in Computer Science and Application. I am a hard-working and quick-learning individual with a diverse social sciences and computer science background. As a quick learner, I learn quickly and can adapt to all situations. My proficiency extends beyond coding with hands-on experience in Data Analysis, Web Development, AI Training, Prompt Engineering, and Data Annotation. Beyond the technical spheres, I own soft skills that are significant for team management. I have a strong foundation in Research, problem-solving, and Conflict Management that provides me a dynamic opportunity to learn and grow. I am always open to accepting new challenges, keeping it in mind that a challenge is an opportunity to explore and flourish.
